## CONNECT YOUR LEGACY AUDIO EQUIPMENT TO THE DANTE® WORLD

- Connect analog audio equipment to a Dante® network
- Heavy duty adapters for rugged stage conditions
- Lockable audio and network connections
- Connect analog or digital signals to a Dante® network
- Feed non Dante® ready amplifiers, speakers or mixing desks with signals from the Dante® network
- Different mounting options (rack, floorbox, table mounting, truss)
- Requires a PoE switch or a PoE injector
- AES67 compliant

### NA2-IO-DPRO

The NA2-IO-DPRO is a 2IN, 2OUT breakout box for mic, line, AES/EBU signals. It features high-quality microphone preamps and 2 Dante® ports for either redundant setup or daisy chaining. There are several remote control options available.

### NA2-IO-DLINE

The NA2-IO-DLINE is a an end-of-network device. It is a breakout box which allows 2 Line-IN, 2 Line-OUT signals to be integrated into a Dante® network.

### NPS-30W

The NPS-30W is a Gigabit Power over Ethernet Supply with 30 W PoE budget. It is a passive power supply that delivers power at all times with no requirement for power negotiation.

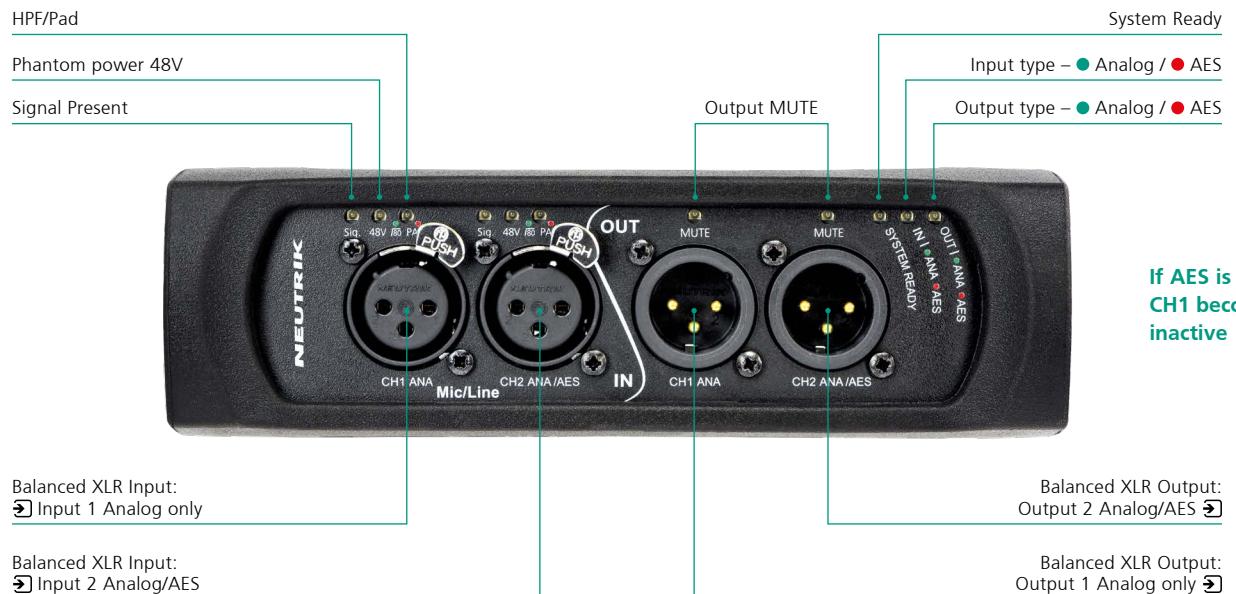

All devices are equipped with lockable connectors and, together with the removable rubber protection, offer a reliable solution for tough stage conditions. With optional mounting brackets or a rack panel, the devices can be mounted below tables, in floor boxes, racks or on a truss.

## POWER AND DATA REDUNDANCY (WITH NEUTRIK NETWORK DEVICES)

### IMPORTANT

- For Power + Data redundancy, 2 x NPS-30W are required.
- Do not combine NPS-30W with other PoE injectors, as this can lead to damage to the powered device, due to different pin assignment.

# APPLICATIONS

# REMOTE CONTROL

There are several ways to remotely control the NA2-IO-DPRO. Depending on the application, users can choose from Neutrik's DPRO Controller software, Yamaha CL/QL digital mixing console, a control plugin for the Q-SYS platform or a module from Crestron's application market. For further applications, a complete AES70 API is available on request.

## DPRO CONTROLLER SOFTWARE

The DPRO controller gives the user not only remote control options such as level, mute, gain, phantom power, input signal and lo-cut, but also the possibility to change the device's network settings and to update the firmware.

DPRO Controller App is available for Windows and macOS, free of charge.

## APP REQUIREMENTS

- RAM min 2 GB
- Display resolution > 1280 x 1024 pixel
- Windows 7 or later
- macOS 10.12 or higher

## Remote functions for fixed installations

Neutrik's NA2-IO-DPRO features full integration within a QSC or Crestron environment.

A QSC approved control plugin as well as a Crestron module are available in the correspondent application market for free.

With this, designers can fully integrate the DPRO into the Q-SYS designer software or Crestron control products to perform various controls such as gain, phantom power, lo-cut, mute and mic/line switch.

This is a convenient solution to system designers for the widely adopted QSC and Crestron environment!

## MIC PREAMP CONTROL VIA YAMAHA CL/QL SERIES CONSOLES

With the firmware version 5.6 for Yamaha CL & QL consoles, the NA2-IO-DPRO can be controlled from the console directly.

The remote option includes phantom power, gain, and lo-cut filter. For example, using the DPRO on a truss is a convenient way to establish ambient miking with short cable runs. Remote control via Yamaha CL/QL consoles provides a real advantage within a Pro AV work environment.
